Onsite Mobile Training Teams
Custom CONUS / OCONUS Solutions
Serving 4 Continents

Weapons & Tactics
Close Protection / PSD
Operational Medicine
Breaching - Dynamic Entry
Airborne Operations
On / Off Road Driving
Specialty / Law Enforcement
The T1G Difference

100% Readiness in Less Time with Measurable Cost Savings

T1G is uniquely qualified to assist and support Tier 1 and Tier 2 SOF specific requirements as well as conventional Special Purpose Forces for team to group sized elements. Whether you require T1G’s Memphis Training Complex for rental or an expertly staffed turnkey solution (onsite lodging/meals for 300+ pax), or a customized OCONUS solution, T1G is here to serve you.

- Multi-Discipline Training that Meets Your Most Challenging Time Constraints
- Versatile for Unique Training Requirements and Full Mission Profiles
  Proper preparation for all missions demands varied and genuine assets, purposefully engineered facilities, as well as relevant customized POIs. Zero noise/fire restrictions and Federal, State, and Local deconflicted allows for low/no light work as well as around-the-clock evolutions in a versatile and realistic in-theatre environment.
- Turnkey • Low Drag from SOW through Execution
  Every T1G event is orchestrated to meet your specific requirements – expertly detailed with you in advance of arrival. We continuously validate goals throughout execution and are able to adjust as needed.
- Instructor Cadre with a Passion for Excellence
  Instructors are thoroughly vetted, highly experienced veterans and professionals. T1G is able to recruit, screen, select, and retain the best instructors and staff due to the clarity of our mission and ability to meet and exceed it for every student.

Visit T1G.com for schedule, pricing, and enrollment.

Specific Multidiscipline Pre-Deployment Training for 12 to 300+ Operators

T1G is purpose-built to support a wide array of customized Pre-deployment Training and Full Mission Profile exercises in one convenient location.

OFFERINGS INCLUDE:

- Mobile Force Protection/Advanced Performance Driving/Off-Road
- Driving/Protective Motorcade
- Customized Situational Training Exercises, Field Training Exercises, Full Mission Profiles – any multi-discipline scenario-based training for your specific mission
- Explosive Ordinance Device / Improvised Explosive Device
- Survival Escape Resistance and Evasion
- Mounted Operations/Military Convoy Ops
- Intelligence Surveillance Reconnaissance
- Non-Combatant Evacuation Operations
- Vehicular Interdiction & Commandeering
- Advanced Urban Combat/SFAUC
- Precision/Limited Scale Raids
- Close Target Reconnaissance
- Reconnaissance & Surveillance
- Urban & Rural Assaults
- Active Shooter Response
- Cordon & Search
- Sensitive Site Exploitation
- Mass Casualty Exercises
- Sniper Ops
- Direct Action
- Convoy Live-Fire Exercise
- Satellite Targets
- Advanced Skills Operations
- Tracking Tagging Locating
- Personal Security Detail
- Combat Search and Rescue
- Dog Training
- Dry Close Air Support
- MFF HALO/HAHO DB SL
- JTAC Integration & Currency

T1G meets and exceeds most Pre-deployment Training requirements all in one location, providing the ideal solution to compress whitespace for your multidiscipline training requirements.

Seamless transitions from flat ranges and Rogers Range to Shoot Houses culminate in the 10-acre live-fire Wadi and 30-acre 15-building Middle Eastern MOUT Village with adjacent HLZs and DZ.

T1G is able to support a unit’s operational tempo and mission profile with round-robin or Ability Group methodology, maximizing range time.
T1G is uniquely capable to meet and exceed your multidiscipline training requirements to minimize downtime and maximize your training time – all in one location.

T1G is partnered with Paragon to facilitate technical surveillance requirements, including Close Target Reconnaissance, Tagging, Tracking & Locating, and COTS manipulation.

T1G is Signal Intelligence capable to meet your mission profile needs.

Small unmanned aircraft system (sUAS)
Forward and downward facing cameras, ideal for overhead surveillance, tracking, and inspecting doorways - Infrared LED for night operations.
The T1G Memphis training complex is purpose built to provide and exceed your Full Mission Profile requirements and is an ideal solution for Tracking, Tagging, Locating and Sensitive Site Exploration with Opposing Forces or civilian role players. Signal Intelligence capable.

Zero noise/fire restrictions and Federal, State, and Local deconflicted allows for low/no light work as well as around-the-clock evolutions in a versatile and realistic in-theatre environment incorporating multidiscipline components.

Your T1G liaison is committed to your operational success and providing the cost effective training solutions you require. Leverage T1G’s weapons & tactics, medical, breaching, and on/off road driving elements for relevant customized solutions.

**Customized Multidiscipline Pre-Mission Training for 12 to 300+ Operators**

**T1G is purpose-built** to support customized Full Mission Profiles in one convenient location.

**TRAINING OFFERED:**
- Mobile Force Protection/Advanced Performance Driving/Off-Road
- Driving/Protective Motorcade
- Customized Situational Training Exercises, Field Training Exercises – any multi-discipline scenario-based training required for your specific mission
- Explosive Ordinance Device / Improvised Explosive Device
- Survival Escape Resistance and Evasion
- Intelligence Surveillance Reconnaissance
- Mounted Operations/Military Convoy Ops
- Non-Combatant Evacuation Operations
- Vehicular Interdiction & Commandeering
- Advanced Urban Combat/SFAUC
- Precision/Limited Scale Raids
- Close Target Reconnaissance
- Reconnaissance & Surveillance
- Urban & Rural Assaults
- Active Shooter Response
- Cordon & Search
- Sensitive Site Exploitation
- Mass Casualty Exercises
- Sniper Ops
- Direct Action
- Convoy Live-Fire Exercise
- Satellite Targets
- Advanced Skills Operations
- Tracking Tagging Locating
- Personal Security Detail
- Combat Search and Rescue
- Dog Training
- Dry Close Air Support
- MFF HALO/HAHO DB SL
- JTAC Integration & Currency
ISR and CAS

- Manned and unmanned fixed wing and non-standard rotary wing capability
- Pilots and operators are experts in HVTs, counter narcotics, DA, maritime interdiction, pattern of life, and SAR
- All personnel are instructor qualified Mission Sensor Operators with a minimum of 2000 flight hrs supporting SOF in multiple combat theaters
- All CAS pilots are current/qualified A-10 Instructor pilots

T1G Weapons & Tactics Courses

Tactical Carbine Operators Course
Teaches students those basic-advanced tactical skills needed to safely operate in a hostile environment. Students are introduced to and review the tactical aspects of carbine handling and marksmanship before progressing to advanced tactical drills. Student abilities are systematically brought to competency while safely employing their carbine and sidearm during movements to contact and demonstrate abilities to deliver rapid & accurate tactical marksmanship skills from 300 yards and in. (40-hour course)

Direct Action Pre-Shoot Course
For special operations personnel assigned to direct action/precision raid components who require sustainment and enhancement training. This intense package is designed to prepare SOF Operators to successfully complete demanding qualification courses as mandated by USASOC/USASFC/MARSOC/JSOC. Through extensive use of the newest computerized and pneumatic targeting systems, students experience training that simply cannot be replicated by our competition. (40-hour course)

Protective Security Detail Course
Enables a Protective Security Detail to provide continuous 360-degree security in a hostile environment while ensuring the physical safety of the principal. Emphasis is placed upon working in teams using force-on-force scenarios under induced high-stress conditions. (40 to 96 hour courses available)

T1G’s Weapons & Tactics courses build on the combat-proven philosophy that mindset, marksmanship, and manipulation are the core skill set of a tactical shooter.

We are uniquely capable to support (multiple) small groups through Special Forces Group sized elements in one location to maximize training and compress white space.

T1G’s 777-acre purpose-built training complex supports a full array of training and critical exercise scenarios including elements of Weapons and Tactics, Operational Medicine, Breaching, and On/Off-Road Driving specific to the current in-theatre needs of Conventional, Special Purpose, and Special Operations Forces.

T1G’s extensive resources complement the ability to execute our philosophy.
High Risk Concealed Carry Course
Provides operators with skill set sustainment and enhancement training in those basic-advanced tactical skill sets needed to safely, quickly, and efficiently employ their handgun from concealed locations. This course prepares operators for demanding deployment profiles that require concealed carry applications. (40-hour course)

Advanced Counter Improvised Explosive Device (CIED) Course
Integrates the various methods utilized to counter the CBRNE/IED threat. Weapons Technical Intelligence collection and exploitation techniques to counter IED networks will be presented to provide the mental and material solutions necessary for effective force protection while enhancing existing security capabilities. (40-hour course)

Advanced Urban Combat Course
Designed to concentrate and integrate advanced urban combat profiles. SOF Explosive Entry, Advanced Combat Marksmanship, Basic Combat Trauma Training, Direct Action Tactics, and Situational Full Mission Profiles are some of the major components of this course. (40 to 96 hour courses available)
Operational Medicine Philosophy

Keeping Names Off the Wall

T1G’s medical training is built on the curricula of the Joint Special Operations Medical Training Center (JSOMTC) and the USSOCOM Tactical Combat Casualty Care (TCCC) courses.

T1G’s staff is seasoned veterans comprised of Army Special Forces, Navy SEALs, Marine Recon, Force Recon, MARSOC, and Air Force Pararescuemen.

The majority of our staff has served time at JSOMTC in instructor and NCOIC billets.

T1G’s key differentiators:

- Completely relevant training
- Low student-to-instructor ratio
- 80% hands-on practical application training
- Our willingness / ability to deliver a custom curriculum to meet your exacting requirements

T1G’s 9-second Drop Zone and multiple Helicopter Landing Zones support a wide array of realistic training environments and critical mission exercise scenarios.

The custom-built Confined Space/Collapsed Structure Trainer and H-60 Medical CASEVAC Trainer provide for a wide array of relevant training scenarios.

T1G has the ability to fully implement cadavers and/or mannequins into any training.

T1G Medical Courses

Basic Combat Trauma Training

Based on the CoTCCC course approved by USSOCOM and designed for the operator level as outlined in the Pre-hospital Trauma Life Support (PHTLS) manual. While the course meets the outlined requirements, we exceed this by providing additional training for the burn and head trauma patients. We put major emphasis on patient assessment skills, concepts, and principles. This course prepares the operator to confidently and effectively apply the life-saving techniques of TCCC. (32-hour course)

Advanced Combat Trauma Training

Based on the CoTCCC course approved by USSOCOM course and designed for the CLS/Medic level as outlined in the PHTLS manual. While the course meets the outlined requirements, we exceed this by providing additional training to not only treat Point of Injury casualties, but to manage these casualties for up to 24-hours. Extensive unit/service scenarios provide situational experience and stress that greatly enhances the student learning. This course not only prepares the CLS/Medic to confidently and effectively apply the life-saving techniques of TCCC, but to sustain the patient for up to 24-hours. (40-hour course)

Advanced Combat Medic Course

For the experienced medic/corpsman/provider. It provides the advanced medical skills to aid in caring for the unit personnel and for the combat casualty. It is the perfect course for the medic/corpsman/provider who might be receiving the casualty, assisting in a field clinic/BAS, or has to provide prolonged care due to MEDEVAC delay. (40-hour course)

Applied Battlefield Medicine

Intensive hands-on practicum for the medic/operator with previous TCCC exposure. This integrates their skills within that scope of practice into challenging and lifesaving real world scenarios. Prepares the medic/operator to be capable of providing appropriate and timely care in multiple simulated combat stressors such as IED, Opposing Forces, confined space and/or high angle situations. (Customized 8-40 hour course)
Special Operations Forces Tactical Medical Refresher

*(SOF TMR / ATP Refresher)*

Meets all of the training requirements outlined by National Registry of Emergency Medical Technicians (NREMT) for recertification of the Paramedic and the USSOCOM Advanced Tactical Paramedic certification. The course affords recertification in ACLS, PALS, BLS, TCCC and PHTLS. The focus is on personnel recovery in full mission profile scenarios focusing on collapsed structure, urban environments, extrication, crash site security, and mass casualty with force on force training. **Full mission profiles tailored to meet specific client requirements.** (84-hour course) *For Open Enrollment availability, visit T1G.com*

Paramedic Recertification Course

Designed to meet the skills sustainment of the EMT-P, as well as seasoned senior medics of the military - Army 18D, Air Force Pararescue, Marine Corps Amphib Recon Corpsman, Navy IDC, and SPECWAR SEAL. PHTLS certificates and CEUs can be awarded if seats and names are confirmed at least 45 days prior to the course starting date. (72-hour course)

Extended Care Course

This 5 day course is designed for the experienced SOF Medic/Corpsman or provider. The syllabus covers critical care for the medical or trauma patient and the evacuation process while operating in an undeveloped theatre with extended evacuation times. Enhanced capabilities will be derived from interpretation of laboratory, diagnostic, monitoring and pre-mission planning considerations. Advanced management techniques will be addressed as observed in recent theaters and trends throughout various medical communities. In depth instruction of subjects will be through didactic presentations, skills stations, and an extensive culminating practical exercise that will test the material covered. (50-hour course)

Flight Paramedic Certification (FP-C) Course

A comprehensive training and exam preparation program. Upon completion the candidate sits for the FP-C certification. The candidate must possess a current NREMT-P or ATP certification in order to attend. This course is designed specifically for the military medic and teaches critical care aeromedical concepts in an easy to understand format. The instructor staff has a 20% higher pass rate than the national average, accomplished through using relevant and to the point instruction. This course provides insight and clarity to complex critical care medical concepts and procedures. This course is approved for FP-C continuing education by the Board of Critical Care Transport Paramedic Certification (BCCTPC). (50-hour course) *For Open Enrollment availability, visit T1G.com*

*These continuing education activities are approved by T1G, an organization accredited by the Commission on Accreditation for Pre-Hospital Continuing Education (CAPCE).*
Breaching Philosophy

Dynamic Entry Requires a Rapid, Successful Breach

T1G employs the use of Current Force equipment that supports relevant operations in OIF/OEF. We use only time-tested and operationally proven tactics, techniques, and procedures.

T1G’s breaching programs provide the knowledge and skill to make dynamic entries through various targets using the most proven current explosive, mechanical, thermal, or ballistic breaching techniques. Performance is instructor-evaluated through multiple live breach iterations and individual AAR’s. Expert staff and on site resources facilitate training and exercise scenarios that are highly relevant to the dynamic entry needs of Special Operations Forces. T1G is capable of hosting your most unique breaching requirements and mission profiles.

Zero noise/fire restrictions and Federal, State, and Local deconfliction support advanced training scenarios that operators may require.

Dedicated breaching classrooms and multiple breaching-related assets are closely located which eliminates downtime for shuffling or transport. This all lends to an expert training scenario that provides maximum hands-on experience and maximum return for your budget.

Your T1G liaison can tailor specific training packages as required.

T1G Breaching Courses

Explosives Handler and Breaching 101
Provides the rifleman with the knowledge, skill, and confidence to use and to have a basic understanding of how explosives work and how they can be best employed. Designed by Special Operations Subject Matter Experts, this course is designed to give the rifleman the knowledge to handle explosives safely and the means to gain tactical entry using explosives during the offensive assault. Attendees repeatedly apply these technical lessons in a tactical environment. This repetition reinforces individual skills, while exposing them to operationally proven breaching charges. They will also cover and rehearse target approach, entry site selection and charge placement. Upon completion of the course, graduates will be able to confidently handle explosives, select the breach point and employ the most effective explosive entry method that gives their element positive entry. (40-hour course)

Special Operations Forces Explosive Entry-2
Provides the Team’s Breacher with the knowledge, skill, and confidence to surgically gain positive entry into a semi or non-permissive target while maintaining the tactical advantage of surprise. SOF EE-2 focuses on hands-on practical exercises to develop expertise. Many of these exercises are drills executed under simulated combat situations on increasingly complex targets. This repetition reinforces the scientific principles while exposing them to operationally proven breaching charges. (40-hour course)

Special Operations Forces Master Breacher
Trains the experienced Assault Team Breacher with the knowledge, skill and confidence to safely instruct his element members in the applied science, basic concepts and procedures of explosive entry. Designed by veteran Special Operations subject-matter experts to meet the needs of those selected for senior breaching positions, the master breacher course focuses on “Training the Trainer.” While hands-on practical exercises are utilized to demonstrate various principles, the focus will be on how to best teach the applied science required for explosive entry and on how to conduct safe training. Additionally, operators cover the safe research and development process for testing new charge configurations/applications. (40-hour course)
Breaching Resources

Two Breach Houses, 30-Acre Military Operations Urban Terrain (MOUT) Complex, Live-Fire Urban Combat Compound, and 10-Acre Wadi are all engineered and purpose-built to support dynamic breaching and surgical entry scenarios. T1G supports ballistic, thermal, mechanical, exothermic, and explosive breaching operations. T1G is resource rich for breaching training. All buildings, explosives handler’s range, and galleries have well-stocked and maintained charge preparation rooms. Two modern classrooms are reserved for Breaching operators.

Non Standard Explosive Breaching Course (NSEB)

The NSEB is an experimental hands on practical application based course that provides the operational breacher with the knowledge to use commonly available military explosives, commercial mining, industrial explosives and equipment for MIL/LE breaching, disruption, and destruction operations (BDD). Industrial explosives and standard bulk military explosives are used in nearly every country on earth and can be tailored for operational employment. The form factors, intended applications, the individual dynamics of the various types explosives, materials and mediums, and the applied physics are the basis of the course.

The five-day course provides the student with a comprehensive understanding of the types of explosives, their common applications, engineering processes and techniques for improvisation to BDD operations. Improvised Explosive Device (IED) has more recently been conveyed as something adversaries and perpetrators create. This “IED” course, although providing insight into the former’s TTP’s, is designed for MIL/LE offensive operations as well as MIL defensive operations. (40-hour course)
T1G Driving Courses

Mobile Force Protection
Prepare students to react to threats against personnel and material in transit. Students learn various techniques to counter current threats encountered in environments such as Iraq and Afghanistan. The course is ideal for personnel deploying to high-risk environments. Emphasis is on manoeuvring vehicles as a unit and responding to ambushes during mounted/ground mobile operations. (40-hour course)

Tactical Operators Course (TOC)
Aimed at the true security professional. Beginning with vehicle dynamics, operators learn to handle the car in true emergency situations. The course spans high speed driving, barricade breaching, escape manoeuvres, precision immobilization technique (PIT), and threat assessment and attack scenarios. (16-hour course)

Executive Protection Driver (EPD)
Combines all the hard skills introduced in TOC, and adds vehicle assault resistance (VAR) as well as close proximity and formation driving. (24-hour course)

Motorcade Operators Course (MOC)
Combines a TOC with motorcade techniques. Students learn communication skills, high-speed convoy, and escape procedures. Class concludes with extensive drills and attack scenarios. (24-hour course)

Off-Road Techniques I & II
Use T1G HMMWV’s or the platform you request, we explore the limits of what is and is not possible. Students are introduced to left foot braking, recovery techniques, road building, using momentum, and a wide array of recovery equipment. Course duration is one-day. Off-Road Techniques II (ORT) More driving time, more obstacles, and more difficulty. (16-hour course) *Combine with TOC for true dynamic on/off road capabilities.

SOF Protection and High Risk Driver Course (SOF P & HRD)
A demanding syllabus comprised of personal force protection, mobility, vehicle commandeering, vehicle recovery, defensive & offensive driving (day/night) to both detect and counter terrorist threats in high risk third world environments. Full-contact combatives and lethal/non-lethal self-defence methods are incorporated into the syllabus.
**T1G Key Differentiators:** Extensive facilities and resources all in one location - WPS Certified Hardball and Rally Style Unimproved Roads tracks, plus expert staffing - *Our ability to meet your exacting needs and requirements.*
T1G is purpose-built to exceed your Pre-Mission/Deployment Training & Full Mission Profile requirements for Tier 1 / Tier 2, or Conventional Special Purpose Force multidiscipline training packages and exercises not capable on post/base.
30-Acre Military Operations Urban Terrain (MOUT) Complex with Adjacent Drop Zone / Helo Landing Zone

T1G’s 30-acre MOUT complex and DZ/HLZ is comprised of 15 buildings. It is adjacent to the 10-Acre Wadi and can be deconflicted with the 5-Story Tower and the CS/CS Tower. Excellent for Tracking, Tagging, Locating and Sensitive Site Exploitation with Opposing Forces or civilian role players.

Live-Fire Urban Combat Compound

T1G’s Live-Fire Urban Combat Compound is purpose-built to instill the skills that novice and expert operators require to execute successful missions. Versatile layout configurations provide relevant scenarios and facilitate effective techniques and strategies for smooth live-fire urban combat operations. Sniper-initiated assault training/exercise can easily be incorporated, enhancing mission dynamics and interoperability.

The compound has a gravelled courtyard with an indigenous 9’ compound wall surrounding both shooting houses. Compound wall has multiple explosive and vehicular breach points (indigenous gates and breaching sections). Compound possesses multiple ingress and egress points integrated to the site’s road network.

- **Fully-ballistic** to 7.62mm Ball
- **Houses** stand 15 meters apart
- **Surrounded by** indigenous gates and 9’ walls for in-theatre realism
- **Reconfigurable floor plans** for realistic industrial or residential scenarios
- **Multiple, fully-breachable entry points**
  - Interior/Exterior Explosive
  - Ballistic
  - Mechanical
  - Thermal

Professional Evaluator Catwalks

Total room-to-room exposure allows facilitators perfect viewpoints for start/stop after-action review and video.
TWO Adjacent Shoot Houses
Quickly Reconfigurable with Multiple Fully-Breachable Entry Points

Shoot House 1: 4,200 sq. ft.

Shoot House 2: 8,000 sq. ft.

Maximum Net Explosive Weight .29  No M855 or Penetrator

Force on Force CQB Trainer

Modern CQB Trainer with 16 cameras for immediate feedback during training
10-Acre **Live-Fire Wadi**

The Wadi is uniquely positioned between the Live Fire Urban Combat Compound and 30-acre MOU Complex with adjacent Helo Landing and Drop Zones. It is a superb environment for realistic Situational Training Exercises. The Wadi supports relevant scenario training for Pre-Mission/Deployment Training and Full Mission Profiles.

- Simulate team rescue/casualty transport to safety under (Simunitions) fire, including airlifts.
- Realistic, challenging terrain for operators to practice live-fire driving scenarios, Pre-Mission Training, and Situational Training Exercises around the clock, leveraging T1G's zero noise/fire restrictions.
- Facilitates explosives and vehicle IED work with any number of realistic explosive and IED scenarios.
T1G’s 2.6 mile hardball track is expressly designed for live-fire and scenario-based training. Strategic placement of multiple berms at key choke points and integrated site features support relevant Situational Training Exercises. A 2,800 ft. straightaway supports high-speed maneuvers as well as landing/take-off for STOL aircraft.
1.6 Mile Rally Style Unimproved Roads Track - WPS Certified

Replicates relevant environments that require advanced driver skills to negotiate safely with speed and confidence.

Designed to provide operators with expert instruction on moving quickly and safely through questionable terrain on realistic surfaces. T1G uses the proven training concept of repetitive cycling that engages muscle memory and familiarization with vehicle behaviour and feedback at maximum limits. This combination ensures drivers automatically react to hazards or threats in the best possible way.

**Unimproved Roads Track Features:**
- Bank, blind, and high / low-speed corners with increasing and decreasing radii
- Speeds of 60+ mph
- Multiple surface variants and transitions
- Elevation inclines and declines (camel humps)
- On- and off-camber banking
- Groomed / maintained surfaces
- Adjacent to 6 Mile Off-Road Track with Engineered Obstacles
Off-Road Driving Track

Engineered Challenges

1. Deep ditch (tail ditch)
2. Alternating speed bumps
3. Small berm/raised berm
4. Small tail ditch
5. Multiple switchbacks
6. Creek run and crossing
7. Angled ditches
8. Hole/berm/hole
9. Speed bumps/angled ditches
10. Trail thru woods
11. Loose sand
12. Sand berm
13. Deep hole
14. Alternating angled ruts
15. Vehicle alley
16. “S” mud pit
17. Logs
18. Down trees
19. Eight obstacles for initial training prior to negotiating the track
20. Simulated Wadi

Designed for tactical convoy operations, off-road tactical, and technical driver training. Facilitates scenarios for emerging MATV-MRAP-like platforms. Over 6 miles of off-road driving area.
75-Yard Multipurpose Turner Range

*Targetry Supports Threat/Non-Threat Discrimination*

Range 2 is the ideal environment to vet a shooter’s reactionary rifle skills. (T1G Rogers Range is the choice for pistols.)

Range 2 builds the fundamental skills required prior to the T1G Shoot Houses, and offers remedial support for those not quite proficient.

- 75-yard Multipurpose Single-Direction Range with 20 lanes
- Pneumatic, computerized 90º turning targeting system
- Assess capabilities and vet group’s skill sets quickly
- Address deficiencies in speed with threat/non-threat discrimination
- Supports pistol, shotgun, machine gun, and rifle up to 7.62mm

150-yard Multipurpose Range

*From zero to 150 yards and beyond, there’s no better range*

Range 3 supports the skills required to survive and succeed from point-of-contact to 150 yards out with pistol and rifle – arguably the most important range skills in combat.

Each of 40 firing lanes has a turner plus two head plate arrays, a steel torso, and up to four runners. Four industrial strength tracks and six trolleys span Range 3’s 140-foot width. Runners can be steel or paper, threat or non-threat. Paper turners can either face or edge you, helping to train target discrimination in shoot or no-shoot scenarios.

Each head plate (two per firing lane) is able to present a bank of six 8-inch reactive head plates providing instant audible feedback, just like the steel torso targets. **Steel provides instant feedback** that operators require to know if what they’re doing is right. Without audible or visual conscious feedback, there is no opportunity to build subconscious memory.

The runners are capable of moving cutouts such as a vehicle to create a hostage scenario for sniper training. Multiple towers with elevated shooting platforms are conveniently located about 300 yards away providing true sniper over-watch characteristics.
The T1G Rogers Range develops the crucial ability to rapidly acquire and engage adversaries in close quarters. It’s fundamental to survival and success, while supporting fast target discrimination.

There are eight lanes, each with seven targets at seven to 20 yards pneumatically operated by computer. Nine primary courses of fire are designed to push and stretch the shooter’s abilities. Throughout the courses of fire, 8” steel targets are only exposed for .5 to .75 of a second.

The steel targets are reactive in design. They must be successfully hit in order to stop them; peripheral hits or fragments do not stop them. This instills the paramount skill of “following through” until the adversary is neutralized. Repetition develops the reactionary shooter skills required to negotiate partial targets that are moving quickly.

The Rogers Range is one of the most popular features at T1G. Shooters are able to measurably increase their confidence and success in rapid and accurate (and discretionary) firing scenarios.

- **M-4 conversion kits in 9mm available**
- **Shotgun Course available with M-4 and Pistol courses**

Range 8’s custom design supports basic instruction of marksmanship fundamentals while facilitating 360° off-the-x training scenarios with Simunitions. **Range 8** is perfectly suited for live fire and Simunition training, including:

- Security detail arrival and departure
- Static vehicle shooting tactics
- Small unit close proximity immediate action drills
- Live-fire medical extraction scenarios

The range facilitates fire-and-maneuver exercises as well as barricade shooting. T1G instructors often use Range 8 in multi-discipline training scenarios simultaneously leveraging multiple T1G resources.

Range 8 supports the safe execution of complex, high-risk course of fire IOT condition appropriate responses to contacts long before operators need to depend on skills in active theatres under combat conditions - which is of course the least forgiving of learning environments.

- Supports pistol, shotgun, machine gun, rifle up to 7.62mm
- Multi-medium applications (cars, walls, ballistic gelatine, and other materials)
Range 4 facilitates mounted or dismounted TTPs able to be exercised with scenario focused live-fire or Simunitions exercises to refine, enhance, or validate the force’s Standard Operating Procedures and Immediate Action Drills. Unique are inclusion of USDAAT models for units that train on worst-case scenarios. Full Mission Profile Situational Training Exercises (STX) to include movement to contact, contact, immediate action and break from contact drills, are safely and efficiently exercised. Adjacent 2- and 5-Story Towers and CS/CS Trainer are deconflicted.

- Approx. 21,000 square feet
- Safely supports up to 100 shooters
- Four access points allow shooting from a moving or static vehicle
- Configurable with multiple static and steel target arrays
- Ideal for large groups engaged in Round-Robin style training
- Designed for mobile fire & maneuver via foot or vehicle
- Simulate urban environments with target vehicles and moveable building facades
- Facilitates 360º “off the X” training scenarios with Simunitions
- Intermediate range immediate action drills and moving vehicle drills
- Pistol, shotgun, machine gun, and rifle up to .50 caliber
- Supports non-fragmentation practice projectiles
Multiple Towers, Helo Landing Zone, and 300yd. Range

Safe and Ideal Environment for Critical, Fundamental, Multidiscipline Skills Training

The purpose-built and uniquely collocated ranges, training areas, structures, and simulators create one of the best training environments students can experience. The proximity of multiple towers adjacent to Range 3, Range 4, the Urban Combat Compound and Military MOUT Complex facilitate training that is difficult if not impossible to duplicate on most other government or private facilities.

The 5-story tower offers vertical closed structure training. Both towers offer multipurpose tactical design and are adjacent to and the Confined Space / Collapsed Structure Trainer. A large Helicopter Landing Zone supports all. The towers facilitate multiple hook & climb, high angle rescue/recovery, and high-line transfer capabilities with primary, secondary, and tertiary anchor points to support technical rescue, rappel, and ascension system/profiles. The towers offset positions serve as the 325 yd. and 350 yd. firing points for Range 4.

The towers can be de-conflicted to support stationary and moving target engagement courses of fire on both Ranges 3 and 4. With T1G prequalification in support of culminating Situational Training Exercises, you can conduct simultaneous sniper initiated assault, pre-selected target reduction (PTR), and over-watching sniper support profiles on the Shoot Houses in the Urban Combat Compound (385 yd. shot).
The KD Rifle Range is perfect for Sniper & Defensive Designated Marksman Teams to zero, collect and confirm data out to 1000m from raised firing points graduated in 100m increments. Firing points and pits support up to 11 two-man (shooter & observer) teams per relay for day / night precision courses of fire / training sessions.

- Range Pits area has conventional target carriages for safe precision manual shot marking with 1", 3", & 5" spotters
- KD Range supports Lateral Moving, Stop & Go, and Limited Exposure Bobbing Targets for development / refinement / confirmation of individual shooter's leads on moving targets when run manually by their Pit crew
- Range supports Carbines and Rifles from 5.56mm up to the newer .338 Lapua / Norma Magnum platforms

1000m Known Distance (KD) Rifle Range

Carriage Type “Pits” Support Precise Data Collection & Confirmation
Target arrays on the UKD Rifle Range can be set to specific client requested parameters for multi-team day / night unknown distance oriented courses of fire or team competitions. Covered 4-Story Elevated Precision Shooting Tower overlooks the UKD Rifle Range. Each of the Five Floors of this tower is a STABLE shooting platform. Range supports up to an 11 two-man teams Firing Line per relay.

**UKD Range & EVSP targetry includes but is not limited too:**
- SteelSwingers
- Challenge Trees
- Breast Plates
- Head Plates
- Hotel / Tango Targets
- Special Effect Targets
- Static Vehicle Hulks on Request
The CS/CS Trainer is designed to allow the most realistic training in an academic, controlled environment. It is designed with specific tasks and scenarios that have been developed from over 10 years of actual combat operations. The trainer allows multiple small teams to function at the same time in worst-case scenarios that emulate domestic or combat environment. Serves as an elevated shooting platform for Ranges 3, 4, and the Urban Combat Compound, and the 30-acre Military MOUT.

- 11,500 cubic feet of operational space
- Multiple openings less than 24”
- Multiple openings greater than 24”
- Multiple entries: elevated or non-elevated
- Openings located on the top, sides, and bottom of the confined space trainer
- Multiple locations with or without obstructions
- Access: Horizontal and Vertical
- The ability to add smoke, light and noise
- Elevated shooting platform
The H-60 Medical Simulator is used to increase proficiency during the tactical evacuation phase of care. The advanced simulator will increase the realism of transporting patients from battlefield to a more secure location. The simulator has realistic high rotary noise and cabin size. The simulator allows the unit to configure the H-60 Medical Trainer as they would in the theater. The simulator allows for combat medics to treat patients aboard an actual moving H-60 CASEVAC platform during day or night operations. The H-60 CASEVAC Trainer is a great alternative when aircraft cancel because of maintenance, weather, or unavailability.

The H-60 Medical Simulator has the same limits in cabin height, width, and length. It has a high power amplifier and speakers to introduce the aircraft noise. The aircraft interior lighting is white, green or red and uses high-powered fans to produce rotor wash. A single PC controls all of these functions. This allows the instructors to replicate the combat environment that they would experience in today’s theater and to increase the effectiveness of the training.
T1G builds classrooms close to where students need them. The property design and classroom layout efficiency reduces downtime to almost zero.

**Classroom features:**
- Climate-Controlled
- Projector • Audio/Visual
- Computer Link
- Each Seat 18-60
- Adjoining team rooms with breakout areas

**T1G Armory**

DoD 5100.76-M compliant, BATF approved Secure Storage Facilities
- Arms Rooms, Ammunition Magazines, Explosive Bunkers
- Double-locked, electronically alarmed & LLE-monitored system
- Receiving Authority Licensed / Approved
- MilStrip and direct shipping of class V materials recommended in advance

---

(10) Climate-Controlled Classrooms

*Collocated with Training Areas*
On Site Meals & Lodging for 300+ pax

Walking Distance to All Training Areas

Showers • Laundry • Wi-Fi • Satellite TV • Gym

T1G’s facilities mean more efficient use of every operator’s time and a major cost savings for lodging and meals. More training time with reduced costs translate to more value on every effort.

• **Price is a large savings over Per Diem.**
• **There are four 700 sq. ft. team rooms, each with 50” flat screen, Satellite TV, and Wi-Fi.**
• **Zero hassles for transit and gear storage** and significantly reduced risk and chance of “off-property incidents”.
• **The lodging facility (LFAC) has six buildings**, including a collocated 24/7 vending, laundry, shower, and bathroom facility (male and female). Laundry facility provides a 50” flat screen TV.
• **Four securable buildings** sleep 50 with private rooms for up to two SNCOIC or OIC. Two additional quarters sleep 64. Each area provides ample chairs, tables, white board, refrigerator, microwave, and coffee. Individual lockers and linens are provided.
